

PRODUCTIVITI

Work Management system

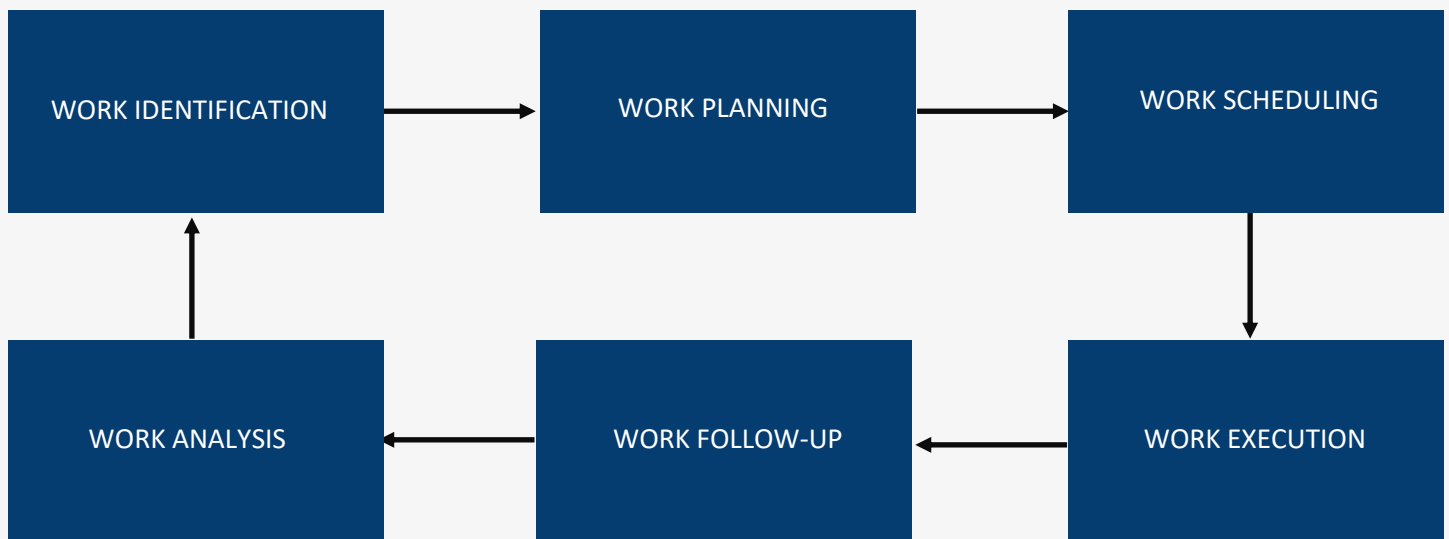

PRODUCTIVITI Work management is a software products that applies workflow structure to the movement of information as well as to the interaction of business processes and human worker processes that generate the information. PRODUCTIVITI is generic, easy to use and customizable, designed to meet industry requirements for the smooth functioning of day to day operations. PRODUCTIVITI gives managers and team members a quick, at-a-glance view into what's going on. At any time, see your overall workload, know what to work on next, understand current priorities, and be able to easily re-organize work when the business goals change.

KEY FEATURES:

- Optimize throughput by automatically assigning work, balancing workloads across individuals, teams and locations.
- Full tracking and audit trails of what activities and tasks were completed, by whom and when.
- More work done in less time and cost.
- Optimize and balance workloads between teams and individu-

PRODUCTIVITI encompasses a wide range of areas spanning from

- Enterprise Content Management
- Accounts Payable/Receivable Automation.
- Human Resources Automation.
- Healthcare Records Management.
- Government Document Management.
- Insurance.
- RFP and Sales Proposal Automation.
